Finding a Program:

- Gradschools.com
- BrainTrack: http://www.braintrack.com/us-colleges
- Peterson’s Guide to Graduate Schools: http://www.petersons.com
- AllAboutGradSchool.com
  - Directories of business, engineering, law, medical & online graduate programs
  - Test prep and financial aid info.
- Princeton Review: http://www.princetonreview.com
- GraduateGuide.com
  - School search engine by academic areas

Evaluating the Program:

**Faculty:**
- What are their educational and professional backgrounds?
- Do their research interest match with yours?
- What type of research are they currently doing?
- How many faculty are there (full-time/part-time)
- What roles do they play in the program? Teaching, advising etc.

**Students:**
- Academic backgrounds (majors)
- How diverse is the student population?
- How large is the graduate program?
- Are students working while attending? Have FT experience? Straight from undergraduate?
- Do they primarily attend full-time or part-time?

**Program Services:**
- What opportunities are available for research, internships, assistantships and other experiential education opportunities?

**Employment Assistance:**
- What employment opportunities are available upon graduation?
- Where do graduates find employment?

**School Environment:**
- What living factors are important to you?
- What type of institution? small, medium, large, public vs. private, geographic location, etc.
- Community and recreational activities available?
